SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

The Map ID column refers to the Map ID-Focus Map(s) of the listed site.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL RECORDS

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 12/11/2017 has revealed that there are 3 SEMS sites within the searched area.

EXECUTIVE SUMMARY

<u>Site</u>	<u>Address</u>	<u>Map ID</u>
BRENNTAG SOUTHEAST, MONTESSORI COMMUNITY THE UNIVERSITY OF NO	2000 EAST PETTIGREW 4512 POPE ROAD 300 SOUTH BUILDING	239-12 324-21 346-24

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 12/11/2017 has revealed that there are 9 SEMS-ARCHIVE sites within the searched area.

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 12/11/2017 has revealed that there is 1 CORRACTS site within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>
THE UNIVERSITY OF NO	1000 -A ESTES DRIVE	384-24

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 12/11/2017 has revealed that there is 1

EXECUTIVE SUMMARY

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 12/11/2017 has revealed that there are 7 RCRA-LQG sites within the searched area.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/11/2017 has revealed that there are 13 RCRA-SQG sites within the searched area.

EXECUTIVE SUMMARY

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 12/11/2017 has revealed that there are 17 RCRA-CESQG sites within the searched area.

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/11/2017 has revealed that there are 63 RCRA NonGen / NLR sites within the searched area.

SSTS: Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

A review of the SSTS list, as provided by EDR, and dated 12/31/2009 has revealed that there is 1 SSTS site within the searched area.

US AIRS: The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

A review of the US AIRS list, as provided by EDR, has revealed that there are 3 US AIRS sites within the searched area.

2020 COR ACTION: The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

A review of the 2020 COR ACTION list, as provided by EDR, and dated 04/22/2013 has revealed that there is 1 2020 COR ACTION site within the searched area.

EXECUTIVE SUMMARY

EDR PROPRIETARY RECORDS

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within the searched area.

<u>Site</u>	<u>Address</u>	<u>Map ID</u>
DURHAM MGP	708 GILBERT STREET	147-6

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 126 EDR Hist Auto sites within the searched area.

EXECUTIVE SUMMARY

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 74 EDR Hist Cleaner sites within the searched area.

 Comments: //One 575-gallon heating oil UST removed w/ 28.05 tons of soil. Initial soil sample had 1050 ppm DRO TPH but post-excavation soil samples were below soil-to-groundwater MSCCs except for 0.0274 ppm PCE in a sample collected near the house gas meter. PCE was not detected in any other sample so it is assumed that the PCE was related to installation of gas line/meter. (Pipe degreaser.) Issuing NFA and sending a copy of sampling results to DWQ Aquifer Protection Section. -MRP//

 Comments: 20,000-gallon heating oil UST removed. 3,439.03 tons of impacted soil removed. Soil above soil-to-gw in sidewall samples, not able to remove soil due to foundation of adjacent buildings. Water in bottom of tank pit with sheen. Did not collect water or base soil samples. Sampling conducted under the paint building that was removed during UST activities. Contamination identified in low concentrations that do not appear to be associated with the UST - Talked to Chris Reinhardt and Bryan Lucas of PSI told them that the soil results from under the former paint building should be reported to Inactive haz section. LSA will be required. WER//4 MW s installed (one deep). Gw above 2L. A stream located in a culvert bisects plume. Mw s located on both side reported below 10x s 2B. Soil from the closure reported above s-to-gw (below residential). Called consultant to discuss deed restriction. He is checking with the RP. Issuing ARR. WER

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Owner/Op end date: Not reported

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): Yes
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Universal Waste Summary:

Waste type: Batteries
Accumulated waste on-site: Yes
Generated waste on-site: Not reported

Waste type: Lamps
Accumulated waste on-site: Yes
Generated waste on-site: Not reported

Waste type: Thermostats
Accumulated waste on-site: Yes
Generated waste on-site: Not reported

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 75554

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 815

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major

redesign to support facility operating permits required under Title V of the Clean Air Act.

COMPLIANCE AND EMISSIONS REPORTING

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

NC-FITS (North Carolina - Facility Identification Template For States) is North Carolina Department of Environment and Natural Resources' (NCDENR) Facility Identification Template for States that provides a common facility identifier in order to improve accessibility to comprehensive information about environmental regulated entities in the state of North Carolina.

AIR MAJOR

HAZARDOUS WASTE BIENNIAL REPORTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

 Comments: One 1,127-gallon heating oil UST removed. Soil above Soil to GW, approx 38 tons of soil removed. NORR sent for LSA. WER//Low Risk. Confirmation samples collected in tank pit/over excavated area and along product lines. Only 2 soil samples above S-to-GW, S1 located in base of pit (at refusal) and S5 located along the west side wall. Groundwater above 2L but below GCLs. Most COCs are gasoline related. A sheen of free product was observed during purging of the well. Sent a NORR for NRP. WER// 10.1.2008 - Received a letter from the Duke requesting a delay regarding submission of the NRP. Instead, Duke has agreed to conduct soil sampling to delineate the extent of contamination in the soil and submit a report of the findings. WER//

FINDS:

Registry ID: 110037426327

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Comments: FP- RW4(8.96'),10/3/96--monthly FP reports:latest 10/30/96.Now hand
 bail weekly,but plan skimmer.KAH //6/19/02: System enhancement
 recommendation rpt recommends replacing P&T w/ AS on RW1 & RW2 and a
 skimmer on RW4. AS will added to RW3 & RW4 wh/////concentrations in
 MW-13 have remained almost constant between 10 and 11K ug/kg benzene.
 EMS proposes continued AFVR. I am interested in not continuing with
 AFVR. Results have not been that positive in past years. Deos not
 appear worth money. CAM 7/11/14/////November 2015 sampling indicated
 that all wells were below GCLs. This is just after ORC socks were
 installed. Most recent TA requests for one more series of AFVR.

 Comments: One 1,127-gallon heating oil UST removed. Soil above Soil to GW, approx 38 tons of soil removed. NORR sent for LSA. WER//Low Risk. Confirmation samples collected in tank pit/over excavated area and along product lines. Only 2 soil samples above S-to-GW, S1 located in base of pit (at refusal) and S5 located along the west side wall. Groundwater above 2L but below GCLs. Most COCs are gasoline related. A sheen of free product was observed during purging of the well. Sent a NORR for NRP. WER// 10.1.2008 - Received a letter from the Duke requesting a delay regarding submission of the NRP. Instead, Duke has agreed to conduct soil sampling to delineate the extent of contamination in the soil and submit a report of the findings. WER//

1021 MINERVA CONDOMINIUMS (Continued)

S107780885

oil UST discovered during removal of the 1st tank. Naphthalene and aliphatic/aromatic carbon fractions remain above soil-to-groundwater MSCCs after 78.86 tons of soil was removed. (Groundwater encountered.) The 2000-gallon UST was noncommercial because it served four or fewer households. -MRP// LSA Review: Low risk. Soil contamination < residential MSCCs but GW contamination > 2L std for C9-C22 aromatics. Issuing NRP NORR for GW. -MRP// NRP recorded by Durham County Reg of Deeds 8/21/06, Book RE 5328, Page 657-660, RKD. 2/6/07 - Current property owner (Rah Bickley) requested copy of NFA since she's selling property. CED sent copy to 12 Streamview Ct, Durham, NC 27713 - CED ////

 Comments:

Work at this site was done in the area of a "previous" UST. The assessment work was done in the assumed of a tank removed in 1996. The report indicateds that Cedar Rock encountered stained soil next to bedrock while advancing a soil boring. "After discussion with the NCDENR incident manager, Cedar Rock was directed to perform a LSA for the property." An incident number was not assigned to the site when the LSA report was received because no soil contamination or gw contamination was detected as documented in the report. I was skeptical that there was a UST or a releaseto beign with. RRO received an affidavit from the home owener indicating that there was a tank and that it had been removed. CAM 8/1/2014 ////

 Comments: 85.23 tons of impacted soil excavated. 2 tanks removed (Tank 1 was 46 in. diameter, 12 feet long, Tank 2 was 64 inches diameter and 6 feet long). 1,167 gallons of water/product removed before excavation. GW was not encountered during excavation, no FP was observed, but strong petroleum odors were observed in backfill material adjacent to the tanks. 6 of 10 > Residential MSCC for C11-C22 aromatics. Tank 1 exceeded StoGW MSCC on bottom sample for naphthalene. Tank 2 exceeded StoGW MSCC for bottom and all 4 sides. Stockpile sample for Tank 1 was TPH-DRO 4700, TPH-DRO for Tank 2 was 12000, Composite sample was TPH-DRO 2800 mg/kg. TPH GRO also exceeded with values of 110, 110, and 75 respectively. LSA required. WTH///// 4/22/2008. No Public Water Supply wells were located <1500 feet from the incident. 6 of 10 samples for soil exceeded the Residential MSCC for aromatics. Water analysis for the MW exceeded the 2L standards for benzene and isopropyl ether and also for aliphatics. Recommending NRP for water and soil with NFA closure. BRH 9.23.2008 Requires NRP for soil & GW. -MRP// 9.25.2008 NRP received and signed by RRO. Sent NFA along with NRP. WER//Received recored copy of NRP. WER

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Comments: .0106 (L) cAP WAS RETURNED TO rp ON 2/8/96; ADDENDUM RECEIVED 7/22/96. Can't close out per 3/98 req.///Ken Schuster gave this site the ranking of Low Risk in 06/29/2004. 07/15/2004, JFM //// //8-2-06 file review: Current property owner refinancing and interested in NFA for incident. (Site now part of West Village.) Emailed consultants for RP, current property owner, and lender(?) and notified them that a risk-based soil sample collected above the water table near the garage foundation in the area of the NE corner of the 1997 UST excavation will be required before NFA. If sample is below s-t-gw MSCCs, can close incident with NRP for groundwater. -MRP// Groundwater sample from MW-4 was BDL, soil is below Soil-GW MSCCs. OK to close with no PN or NRP. Report reviewed by RKD, 10/09/06.

	Property Description:	The on-site commercial building is divided into seven units 102, 104, and 106 Morris Street and 101/103, 105, 107, and East Chapel Hill Street. At the time of the site inspection, four of the seven units were vacant, including the upper level of the facility. The remaining three units are occupied by Scott Customs Tailors, Excelsior Barber Shop and Crayons 2 Calculators, a non-profit organization dedicated to supplying students with study materials. The on-site building has been used for commercial purposes since its construction in the early 1900's.

 Comments: Mickey Roberts reviewed report 10/28/04. File was in open files and does not appear that it should have been closed but database indicated it was closed 2/19/93. 2/1/93 - UST CLO rtp submitted: 1x1K gal and 2x6K gas USTs were located at site. During closure activities on 01/19/93 1x6K orphan UST located. USTs removed on 1/19/93. Soils > TPH. 11/2/04 - Soil Excavation Rpt dated 07/18/93 received. 999.33 tons of contaminated soil excavated 6/3/04-6/7/04. Confirmation samples were <10ppm, 11/3/04, RMR. 11/5/04 - NFA Issued. - CED ///

 Comments: 9.22.2008 Reviewed UST Closure Report dated 10.27.1992. One 8,000-gallon heating oil UST was removed in September 1992. The tank was located on a concrete slab approx. 11 feet bls. Stained soil and FP pooling was noted prior to soil excavation. Obviously contaminated soil was removed and stock piled on site. Confirmation samples were collected from side walls and two from the base (below and adjacent to the concrete slab). Samples only ran for O&G. The side wall sample collected near Roxboro Street reported 460 ppm (above 250 ppm action level) They could not excavated further due to the road, slope of excavation in relationship to the road, and utility poles in the area. WER// Sending NORR for LSA and to install MW in location of sidewall sample #2 (460 ppm for O&G). Also, collect soil sample for risk base. WER //

Map ID	Site	Database(s)	EPA ID Number
133	DURHAM HOUSING AUTHORITY 330 EAST MAIN STREET DURHAM, NC 27701 FINDS: Registry ID: 110006716848 Environmental Interest/Information System NC-FITS (North Carolina - Facility Identification Template For States) is North Carolina Department of Environment and Natural Resources' (NCDENR) Facility Identification Template for States that provides a common facility identifier in order to improve accessibility to comprehensive information about environmental regulated entities in the state of North Carolina. US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality. <u>Click this hyperlink</u> while viewing on your computer to access additional FINDS: detail in the EDR Site Report.  Comments: //Environmental Assessment of site yielded a 1959 aerial photograph showing a gas station that is no longer present. Soil contamination observed in the corresponding area is above the soil-to-groundwater MSCCs (below residential MSCCs) and groundwater contamination is above 2L. Incident is low risk according to LSA for adjoining Merchant's Tire incident. (Incident #26118) Needs NRP for GW prior to NFA. -MRP// NRP recorded by Durham County Reg of Deeds 7/14/06, Book 5284, Page 923-927, RKD//errata box

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Comments: //One 15K gallon gasoline UST and one 10K gallon diesel UST removed.
 91.32 tons contaminated soil initially removed and an additional
 1044.85 tons removed following demolition of the maintenance
 building. Soil contamination remains above residential MSCCs, likely
 due at least in part to the incident 5512 and/or incident 7998
 releases. -MRP, 4-16-04// //Request to temporarily abandon all
 remaining MWs rec'd 6/16/06. City wishes to temporarily abandon MWs
 due to construction/grading activities. Consultant is GPSing &
 surveying in locations relative to landmarks that won't be affected
 by construction for re-installation later. Approving plan. -MRP//
