Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

. Waste name: CORROSIVE WASTE

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 496

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Amount (Lbs): 148

Waste code: D005
Waste name: BARIUM
Amount (Lbs): 121

Waste code: D007
Waste name: CHROMIUM

 EPA Region: 04
 Land type: Private
 Classification: Small Small Quantity Generator
 Description: Handler: generates more than 100 and less than 1000 kg of hazardous waste during any calendar month and accumulates less than 6000 kg of hazardous waste at any time; or generates 100 kg or less of hazardous waste during any calendar month, and accumulates more than 1000 kg of hazardous waste at any time

Owner/Operator Summary:

Owner/operator name: SAM'S EAST INC
 Owner/operator address: PO BOX 8041
 BENTONVILLE, AR 72712
 Owner/operator country: US
 Owner/operator telephone: Not reported
 Owner/operator email: Not reported

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

During site visit/meeting 2 MW were identified on site. These wells were installed during the initial site investigations but not sampled and reported to the state. This report covers the sampling of the two on site wells. Both wells sampled for 8260, 8270, MADEP VPH & EPH. Both samples reported BQL for all COCs. Based on soil samples collected during initial response and 2010 gw results. NFA issued. WER Not reported

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

NC-FITS (North Carolina - Facility Identification Template For States) is North Carolina Department of Environment and Natural Resources' (NCDENR) Facility Identification Template for States that provides a common facility identifier in order to improve accessibility to comprehensive information about environmental regulated entities in the state of North Carolina.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

5,000-gallon gasoline, one 150-gallon #2 fuel oil USTs 7.25.1997 WST Closure Assessment Report written by Aquaterra Engineering. Soil samples collected from the sidewall samples of 2 excavation pits reported: GRO - T2-1 @ 14 mg/kg, T3-1 @ 23 mg/kg, T3-2 @ 310 mg/kg, and T4-1 @ 2,100 mg/kg 10.10.2000 Sabra Elder sent Jack West a NORR after receiving the UST Closure Report - did not indicate that any additional assessment work was performed. 10.13.2000 Phone record from Mark Powers - States: Mr. West was under the impress the incident was closed. He said someone from this office visited the site in 1997 and told him that he would not need to do anymore assessment. Also, they stopped digging due to the danger of damaging the adjacent street. The rest of the phone interview states other ownership as stated below. 11.17.2000 Mark Powers sent letters to various potential RP s, affidavits to determine regulatory responsibility. Contacted: Dibrell Brothers, Inc. Marvin L. Barnes (registered agent: M.M. Fowler, Inc) A.C. Williams Jack West Per the affidavit submitted by Jack West, he nor his partners were aware of the USTs prior to the purchase of the property on June 27, 1984 when the property was purchased from C.W. Walters Co., Inc., a subsidiary of Dibrell Brothers. A Gulf station operated on the site from as early as 1938 until the mid-1960 s. ? 1947 1961 the gas station was known as Williams gulf operated by A.C. (Preacher) Williams of 1203 East Oak Street, Durham, NC ? 1961 1964 the gas station was known as Thompson Gulf, Clark s Gulf and Sutton Gulf. operated by M.M. Fowler, Inc. of 1529 S. Miami Blvd, Durham, NC 27703. ? M.M. Fowler leased the station from the C.W. Walters Tobacco Company pursuant to a ground lease. 9.26.2008 Barney West is Jack West uncle. Barney is also the registered agent for RXP LLC, the corporation that the West s sold the property to. I spoke with Barney West on the phone, discussed an LSA and that I would be sending him a NORR to conduct an LSA. After talking with Barney I spoke with Mark Powers about sending the site to STF. I will forward the site to STF. Contact info: Barney West 1816 GRADY DR DURHAM, NC 27712 (919) 620-6760

Property Description:	At the time of inspection, the subject site was operating as CC&W Enterprises, a manufacturer of electronic parts and equipment. Current operations at the subject site include industrial manufacturing in the northeast portion of the facility constructed in the early 1970 s and commercial office space in the southeast portion of the facility constructed in the early 1990 s. The original portion of the facility constructed in 1901 has been used for dry storage since current operations began in 2002.

Comments:	Reviewed APS Inc # 85488 from archives. The file consists of two sites. One located west of Dillard (Block A (Inc. # 92062)) and east of Dillard (Block B (Inc. #85488)). The two Incidents were filed

MAP FINDINGS
FOCUS MAP 11

S109164505

together after Inc. 85488 was closed. No incident number was assigned to Block A at that time and only a CSA and CAP were submitted / in the file. After talking with Mark Powers, the two sites should be separated and Block A would be PIRFed as a UST per the CSA and CAP. Additional testing conducted by CEA for Hendrick Auto identified contamination in an area of the property not identified in the CSA as where the fueling station was located. Also, due to only soil contamination and not gw this is being treated as a separate incident. WER//After reviewing U-Risk sites and RUST data base. Inc. # 33332 is the same site. The file was missing from the RRO due to it being filed with Inc. # 85488 as explained above. WER// File submitted for State Lead consideration 11/17/08. -MRP//

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

NC-FITS (North Carolina - Facility Identification Template For States) is North Carolina Department of Environment and Natural Resources' (NCDENR) Facility Identification Template for States that provides a common facility identifier in order to improve accessibility to comprehensive information about environmental regulated entities in the state of North Carolina.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Comments: Received a "Request for CSA" letter from Shield Eng. Requesting that a CSA not be conducted. JFM sent a NORR to Wayne Burke of Lee Air Conditioners as the RP. Both Shields letter and Johns letter were dated June 30, 2008. I called Shield Eng. To confirm they received John letter and that their client was not the RP. WER//

EVANS M/M #2 (Continued)

1011581358

(NCDENR) Facility Identification Template for States that provides a common facility identifier in order to improve accessibility to comprehensive information about environmental regulated entities in the state of North Carolina.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

	Property Description:	The subject property is improved with one two-story approximately 1,200 square foot building constructed in 1969. The subject site is accessed from the east by Ridgeway Avenue and additional improvements included a paved asphalt parking area on the southeast portion of the site. The site and its surrounding properties are provided with water and sewer service from the City of Durham Public Works Dept. and electricity from Duke Power. The facility has been vacant since 2009 and is not currently equipped with heating or air conditioning.

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Property Description:	Based on Sanborn fire insurance maps, the subject site appears to have been first developed as early as 1913 with a single dwelling. According to interview information and information from the Durham County Tax Administration Office, the present-day structure was constructed in 1921. Review of historic information indicates that the subject site was originally developed as a bank and was later occupied by an electric company which utilized the subject site for an office. The subject site has also been occupied by a pawn shop and a church.

Property Description:	The one building on the subject property is a small house built in 1920 with 788 heated square feet and has had only one improvement since. Although the City of Durham GIS maps indicate there are two residences along Pettigrew Street these structures were demolished within the last two years. The parcels have no roads, paved driveways, or other improvements but there are city roads adjacent to all sides: East Pettigrew Street to the north, Joplin Street to the south, Bacon Street to the east and Bernice Street to the west.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 3600

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN

RCRA-SQG:

Date form received by agency: 08/04/2016
 Facility name: WALMART SUPERCENTER #2137
 Facility address: 5450 NEW HOPE COMMONS DR
 DURHAM, NC 27707
 EPA ID: NCR000002360
 Mailing address: PO BOX 8041
 BENTONVILLE, AR 72712-8041
 Contact: REBECCA HAYNIE
 Contact address: PO BOX 8041
 BENTONVILLE, AR 72712-8041
 Contact country: US
 Contact telephone: 479-258-6810
 Contact email: REBECCA.HAYNIE@WALMART.COM
 EPA Region: 04
 Land type: Private
 Classification: Small Small Quantity Generator
 Description: Handler: generates more than 100 and less than 1000 kg of hazardous waste during any calendar month and accumulates less than 6000 kg of hazardous waste at any time; or generates 100 kg or less of hazardous waste during any calendar month, and accumulates more than 1000 kg of hazardous waste at any time

Owner/Operator Summary:

Owner/operator name: WAL MART STORES EAST LP
 Owner/operator address: PO BOX 8041
 BENTONVILLE, AR 72712
 Owner/operator country: US
 Owner/operator telephone: 479-204-0402
 Owner/operator email: Not reported
 Owner/operator fax: Not reported
 Owner/operator extension: Not reported
 Legal status: Private
 Owner/Operator Type: Operator
 Owner/Op start date: 10/17/1995
 Owner/Op end date: Not reported

 Comments: 3FT OF FP FOUND IN SUPPLY WELL NEAR HARDEES. Pumped FP out and abandoned WSW. RP in question due to ownership of store. No response from RP. Nothing done since 96. A DOT map shows there was an old service station at same approximation ocation as the existing Hardee's about 35' from the contaminated well (see DOT map in file). This old service station was the nearest apparent contamination source to the well with free product, not Harold's Food Mart. PIBS staff checked database and reported no record of Harold's Food Mart. PIBS unsuccessfully queried database for a number of other names/addresses including: 7117 Old Durham Rd, Old Durham Rd, and former store owners Shieh and Heard. Secretary of State website search provided no returns for any of the store owners/operator names on record, including Mr. Shieh or Edward B. Heard. --DMD, 11/23/09///This incident is being referred to the State Lead program-DMD, 1/5/10///

FINDS:

Registry ID: 110059762350

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

NC-FITS (North Carolina - Facility Identification Template For States) is North Carolina Department of Environment and Natural Resources' (NCDENR) Facility Identification Template for States that provides a common facility identifier in order to improve accessibility to comprehensive information about environmental regulated entities in the state of North Carolina.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 78

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Amount (Lbs): 124

Waste code: D007
Waste name: CHROMIUM

 Comments: UST in-place closure report - two 1,000-gallon waste oil usts located side by side. Consultant collected 3 side wall soil samples. The fourth side of the usts could not be sampled due to the building wall and footers of the wall. Soil samples reported bql for 8260, 8270, VPH, & EPH. Metals were detected but below soil to GW and Inactive Haz Sites Remed. Goal. The report was not accepted due to lack of MW and groundwater sample. Deficiency letter sent. WER// 11/25/2009 received additional information - MW install and sampling. GW reported above 2L. Issued NORR for LSA. WER/// No wsw within 1000' of site, GW reported at Benzene - 1 ug/l, Naphthalene - 42.7 ug/l, p-Isopropyl toluene - 5.7 ug/l, c5-c8 Aliphatics - 458 ug/l. all below gcl's. NOR for NRP issued WER

FINDS:

Registry ID: 110059762350

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

 Comments: 654 PPM TPH REMAINING IN UST PIT. 02/21/97 - NOV issued for release.
 - CED //// 10/29/96 - UST Clo rpt submitted: Release discovered following removal of 550-gal heating oil UST on 10/7/96. Base soil sample > TPH (654 ppm). Approx. 25.07 tons impacted soil removed. Sidewall samples BDL. Recommends site closure. - CED //// 08/28/07 - LSA NORR issued - CED //// 09/04/07 - Bob Payne called Re: NORR, said all contam. soil was removed, this also included base sample soil. He thinks base sample was not required at that time. Therefore clean closure. He will look in file to see if NFA issued. - CED //// NFA Issued. - CED ////

 Comments: One 550-gal & one 1000-gal heating oil UST removed w/ 42.77 tons of soil. Initial soil sample under 1000-gallon UST had 52.1 ppm DRO TPH but was BDL for 8260/8270/MADEP. Soil under the 550-gal UST was visibly contaminated and intermediate over-excavation

 Comments: 03/06/95 - UST CLO rpt: 10K heating oil USTon-site. Soil contam. Identified @12-13' bls to N of UST, all other samples BDL. - CED ////
 02/08/08 - UNC decided to remove the UST. On 08/06/07 UST removed from site. Closure samples collecetd from beneath UST > TPH (CS3=99 mg/kg). Resampled location for RBCA. Only dibenz (a.h)anthracene was > S-GW MSCCs. Approx. 19.53 tons impacted soil removed. SW sample > S-GW MSCCs. (SW-2 could not be excavated further due to building foundation)). GW not encountered. No FP. Irrigation WSW located adj to UST not in use, but not abandoned. Recommends LSA. - CED ////
 02/19/08 - LSA NORR Issued. - CED ////Soil exceeds comm/indus MSCCs. GW exceeds 2L for PCE and is present above detection levels for trichlorofluoromethane and chloroform; however, no petroleum constituents were detected. Additional soils cannot be excavated due to presence of generator, etc. Site remains high risk due to irrigation well (still in use per Larry Daw, UNC). Site below TF funding bar; therefore, sending stop funding NORR.DMD, 10-21-10////MW Resampling. -MRP//non-petroleum constituents only; data has been provided by UNC to Inactive Hazardous Sites Branch for review. DMD, 1-21-11 ////

NICHOLSON, PATRICK PROPERTY (Continued)

S108493104

Holes in UST. Soils > S-GW MSCCs. Approx. 50.93 tons impacted soil removed. Sidewalls could not be further excavated due to foundation. Recommends LSA. - CED /// 04/03/07 - NRP for Real Estate Transaction Received. NRP for soil and GW. - CED /// LSA findings indicates that, following removal of 50.93 tons soil to depth of 8 to 12 ft bls, some contamination remains above s-t-g and resid soil mscCs; site monitoring well encountered gw at approx 45' bls with no gw contamination; nearest supply well is 800' away; consultant recommends reducing risk to "Low" and issuing Notice of No Further Action.dmd,5/13/09///

 Comments: 05/12/06 - 24 Hour notice received. Release discovered following soil sampling surrounding 550-gal heating oil UST.- CED //// 05/20/06 -

MAP FINDINGS
FOCUS MAP 23

Map ID Site Database(s) EPA ID Number

BROWN, EDWIN PROPERTY (Continued)

S107780911

LSA Submitted: Due to site restrictions it was decided to leave the UST in place until an LSA had been performed. Soil and GW sampling were performed on 03/28/06. WSW for Irrigation located ~223' cross-gradient in topographically steep setting, intermittent stream located ~85' W, no WHP. Bedrock ~6'. DTW= 15' bls. Soils > TPH and Res MSCCs, GW BDL. Consultant trying to get site ranked as low risk as WSW crossgradient. Should really be high risk- CED //// 06/08/06 - spoke to RKD about reducing the risk for the site. Decided to lower risk from high to low as WSW is located cross-up gradient to the E, GW flow is to the W, no GW contam on-site, only aromatics > Res and S-GW MSCCs. - CED //// 06/13/06 - NORR for NRP issued. Soil only. - CED //// 07/06/06 - UST Clo rpt submitted by cedar rock: Due to the location of the UST it was decided that abandonment in place was the most feasible. UST was steam cleaned prior to abandonment. 06/30/06 UST filled with cement slurry. - CED //// 08/22/06 - NFA Issued requesting NRP filing and PN. - CED //// NRP recorded by Orange County Reg of Deeds 8/23/06, Book RB4110, Page 289-294, RKD. //// 09/15/06 - PN received. - CED ////

 Comments: One 550 gallon heating oil tank was closed in place. It was located under a portion of the brick patio at the rear of the house. The tank was cleaned by pressure washing and filled with a flowable fill cement slurry on May 16, 2007. A soil sample was taken from soil 4 feet below the tank. A monitoring well was installed. Soil results exceeded soil to groundwater MSCC for 1,3,5-trimethylbenzene, total xylenes, and 2-methylnaphthalene, and exceeded Residentials MSCC's for c9-c18 aliphatics and c9-c22 aromatics. Ground water samples showed no petroleum constituents. No FR observed. Surrounding properties are on public water. - 07/02/07 - NRP AFILED. - CED////
