

## Invitation For Bid (IFB) Addendum

**ITB No.** 26-073 **Addendum One (1)**

**ITB Title** Bus Stop Improvements Falconbridge & Huntingridge

---

### To: All Bidders,

This addendum includes the following additions, clarifications, and/or modifications and shall become a part of the plans and specifications. This addendum shall supersede the original bid documents in the event of any conflict.

### Questions and Answers:

- 1) Q: Could you please confirm whether this is an installation-only project, or if it also includes the fabrication of bus shelters and associated amenities?

A: Refer to Specification Section 21. Install Shelters, Benches, and Other Amenities.

- 2) Q: We find that beginning with page 82 through page 104 of the 118 page set was changed for some reason and we cannot get a large set of pages printed. Could you look at changing these sheets if possible to allow us to print those pages (82-104) in a larger sheet? It would greatly enhance the bidding process on our end.

A: Please see resized drawing set:

IFB 1012-26-073 - Bus Stop Improvements Falconbridge and Huntingridge - Addendum 1 Plans resize set.

<https://gotriangle.org/procurement>.

- 3) Add to the end of Specifications Section 5 – Temporary Traffic Control

#### Traffic Control Plan Requirement

The TCP shall conform to the current editions of the Manual on Uniform Traffic Control Devices (MUTCD) and North Carolina Department of Transportation (NCDOT) Standard Specifications for Roads and Structures, including Section 1100 – Work Zone Traffic Control, and all applicable Roadway Standard Drawings.

---

Submit the TCP to GoTriangle for review and approval prior to beginning work. Do not commence any work that impacts vehicular or pedestrian traffic until the TCP is approved.

The TCP shall include, at a minimum: lane closures (if required), work zone setup, traffic control devices, pedestrian accommodations meeting ADA requirements, maintenance of access to adjacent properties and transit operations, and the proposed location and operation of construction equipment within the work zone.

The Contractor shall clearly indicate within the TCP:

- Locations for staging, parking, and storage of construction equipment and materials
- Equipment access points and haul routes to and from the work zone
- Equipment operating areas, including swing radius and buffer
- Measures to protect vehicular and pedestrian traffic from construction equipment operations
- Any temporary closures or adjustments required to safely accommodate equipment use

Provide, install, maintain, and remove all traffic control devices in accordance with the approved TCP. Maintain traffic in accordance with Section 1100 of the NCDOT Standard Specifications.

All costs associated with traffic control, including preparation of the TCP, shall be incidental to the contract and included in the bid prices. No separate payment will be made.

Failure to comply with these requirements may result in suspension of work until corrected, at no additional cost to the Owner.

Pre bid meeting attendees list below

## Pre-Bid Conference Sign-in Sheet

Date: 5/5/2026
